## SECURITY RESEARCHER

linux@linuxizm.website · linuxizm.website · github.com/Lunixizm0 · linkedin/utku-ceylan-

### PROFILE

Security researcher focused on Linux systems and Vulnerability research.  
Discovered and reported multiple findings across GNU/Linux ecosystem.

### EXPERIENCE

#### Independent Security Researcher

June 2024 - Present

- Identified a critical vulnerability in LiderAhenk. (9.8 CVSS)
- Vendor confirmed and remediated; coordinated with CERT-TR; MITRE CVE assignment pending.
- Conducted independent security research on the Pardus ecosystem in collaboration with Pardus and TÜBİTAK BİLGEM teams as part of Teknofest Pardus 2026.
- Submitted 10 security findings affecting the Pardus & ETAP ecosystem via responsible disclosure.

#### Cybersecurity & Software Team Lead, ThinkTank Software (School Team)

September 2025 - Present

- Lead the technical planning, architecture, and coordination of cybersecurity projects.
- Conduct security research on open-source software and guide vulnerability assessment activities within the team.
- Organize internal CTF events.
- Contribute to the design and development of multiple projects.

### PROJECTS

#### ahenk-debug

Linux diagnostic CLI designed for troubleshooting Pardus ETAP environments. Provides identity validation, broker connectivity testing, service health analysis, ETA API verification, and automated reporting.

#### linux-autoruns

Sysinternals Autoruns equivalent for Linux. Scans 16 autostart entry points (systemd, cron, XDG, PAM, kernel and more) and presents them in a Qt6 GUI with filtering, editing, and JSON/CSV export.

#### Portfolio Website

Interactive portfolio website presenting security research, projects, and technical documentation through a Linux-inspired desktop interface. (linuxizm.website).

#### Other Projects

firebase-dumper (Firebase security assessment tool extracting Firestore, Auth, Storage and more via the Admin SDK), Walkie (encrypted p2p LAN communication platform developed within ThinkTank Software), SearchThings (parallel file search tool written in Rust), and Vulnerable-API (educational Flask API with intentional web vulnerabilities for hands-on training).

### HIGHLIGHTS

10 vulnerabilities submitted.  
1 vendor-confirmed vulnerability (MITRE CVE pending)  
Multiple disclosure coordinated with **CERT-TR**  
Contributor - **Teknofest Pardus 2026**  
Active in competitions

### SKILLS

#### PROGRAMMING

Python  
JavaScript  
Shell Script

#### SECURITY

Vulnerability Research  
Web Application Security  
Cloud Security (Firebase)  
Linux Security  
Access Control Analysis  
Dynamic Analysis  
Responsible Disclosure  
Network/Protocol Analysis

#### LINUX & SYSTEMS

Linux Internals  
System Debugging  
System Administration  
Debian Packaging  
Linux CLI Development

#### TOOLS

Git  
Docker  
Podman  
GitHub Actions

### EDUCATION

#### Borsa İstanbul Başakşehir Vocational and Technical Anatolian High School

Computer Technologies  
İstanbul, Türkiye

### LANGUAGES

Turkish **Native**  
English **B2 (Upper Intermediate)**
